

BOTANICAL BOOKMARKS

You'll need

1. Cyanotype paper
 2. Flowers, feathers, leaves, or other natural decorations
 3. Glass or transparent plastic
 4. A room with no windows
 5. A sunny day
 6. Tap or faucet
- Optional:
1. Masking tape
 2. Glue sticks
 3. Card stock

Instructions

1. In a room with no windows, cut the cyanotype paper into bookmark size, usually 2x6" or 2x8".
2. Still keeping away from sunlight, use the decorations to design your bookmark.
3. Use the glass or transparent plastic to cover your design and fasten tightly to ensure the design doesn't shift.
4. Expose your design to sunlight for 5-15 minutes.
5. Rinse your bookmark under water for 1-2 minutes, then let dry completely.

Optional Extras:

- For stiffer bookmarks, glue your cyanotype paper to card stock and let dry completely before cutting into shape.
- Use masking tape to create a white border around your bookmark or add extra design elements.
